

November 10, 2025: Letter to the White House

I am writing to inform you that the United States surveillance agencies are being used as tools of oppression by the President of the United States of America.

In 2021, I filed numerous lawsuits to investigate the results of the 2020 election around the State of Texas. Around that time, the Donald Trump campaign for President began sending messages that implied that they were aware of my efforts and that my efforts were seen by their campaign.

Since that time, Donald Trump's team has proceeded to continue spying on our home in a malicious way that includes driving an infinite number of vehicles past our home to prove that we are being watched both inside of our home, and around our home, by an advanced type of spying technology.

Also, everything that I write and everything that I read on my computer is being monitored by this team of spies that is then sending vehicles past our home to prove that we are being spied upon at all times.

Each day, at all times, we are being held inside of a spying bubble that is sending vehicles past our house to cause agitations and disruptions in numerous ways that are harmful to the peace of our home.

In addition to the loud exhausts and disruptive machinery sounds, the drivers of these vehicles are also displaying messages in the form of 'sign language' that symbolizes various reactions that we are receiving from the team of spies that is maliciously seeking to harm us every day.

This is an ongoing problem that we have faced for several years now. Ever since we became members of the Republican Party of Texas, our home has been subjected to a spying presence, and once we stopped supporting Donald Trump's efforts, that spying presence became malicious and harmful to our health and property.

I am writing to both inform you that I believe Donald Trump is teamed up with the spying technology of Space-X's Star-Shield Program to cause malicious harm to his political opposition; and I am also writing to inform you that his team is using this technology to spy on us while at the same time controlling a gang of criminals to 'drive by' our home and follow us around during our travels.

The general effect is that we are being held inside of a 'Catch and Kill' bubble of oppression to keep us from sharing our story about how Donald Trump is causing us harm in our life.

I have contacted numerous law enforcement agencies about this problem and have not received any type of positive response whatsoever. I have also contacted our federal, state, and local politicians who have also not responded in any way.

Since this problem seems to be placed squarely upon my lap without the assistance of anyone else in the country to help me, I am writing to inform you of the serious breaches that are occurring in our nation's national security.

A group of criminals is being fed information from a spy network that is then using that information to stalk American citizens around the world.

This is very serious criminal behavior that began from the campaign of Donald Trump for President, extended to veterans in our family and local area, and then extended to a large network of criminals.

To be clear, we have traveled to Spain and back twice now and experienced the same effects.

This is a world-world network of criminals that is being fed information from the USA spy state to 'track' and oppress Americans around the world.

Please be advised that this is the current state of America under the iron fist of Donald Trump.

 PRESIDENT DONALD J. TRUMP
